

INDUSTRY FACT SHEET:

The Home Building, Land Development and Professional Renovation Industry in the Greater GTA

AN ECONOMIC ENGINE

With up to 100,000 people and 50,000 jobs coming to the GTA every year, the building, land development and professional renovation industry is supporting the growth of our region and economy.

In 2013, residential and non-residential construction generated:

34,719

new housing starts

\$22.6 BILLION

investment value of construction, renovation & repair, acquisitions & conversions

207,400 jobs, paying
\$9.7 BILLION in wages

In 2012, professional renovation generated:

\$13 BILLION

in investment value of renovation and repair

99,900 jobs, paying
\$5.3 BILLION in wages

GOVERNMENT CHARGES AND HOME AFFORDABILITY

Government charges and fees represent a significant portion of the cost of a new home in the GTA and may be eroding affordability and choice for home buyers.

On average, these charges account for:

Development charge increases outpace home prices

- GTA development charges
- average new low-rise home price
- average new high-rise home price

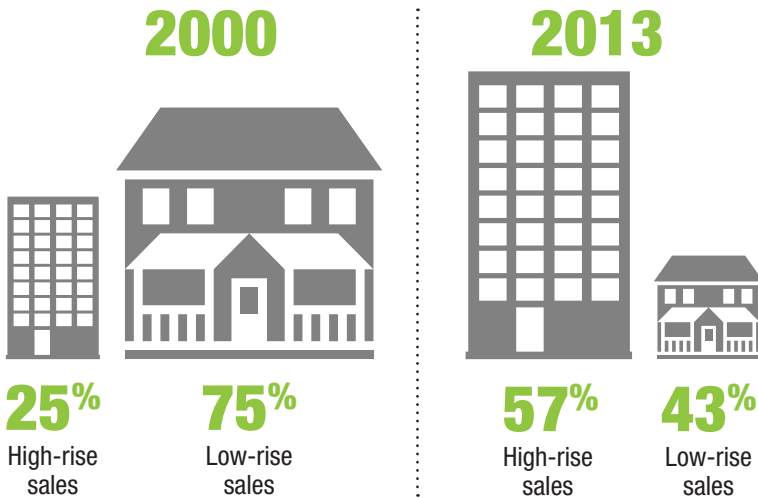

An unfair tax burden:

\$1,000,000,000

in development charges are paid by GTA new home buyers every year to fund growth-related infrastructure like bridges, sewers, libraries and other public services.

INDUSTRY IS RESPONDING TO *PLACES TO GROW* INTENSIFICATION TARGETS

Unfortunately, many municipal zoning by-laws haven't followed suit. In too many cases, development applications have been subject to lengthy rezoning processes despite being in keeping with growth targets set out in *Places to Grow*.

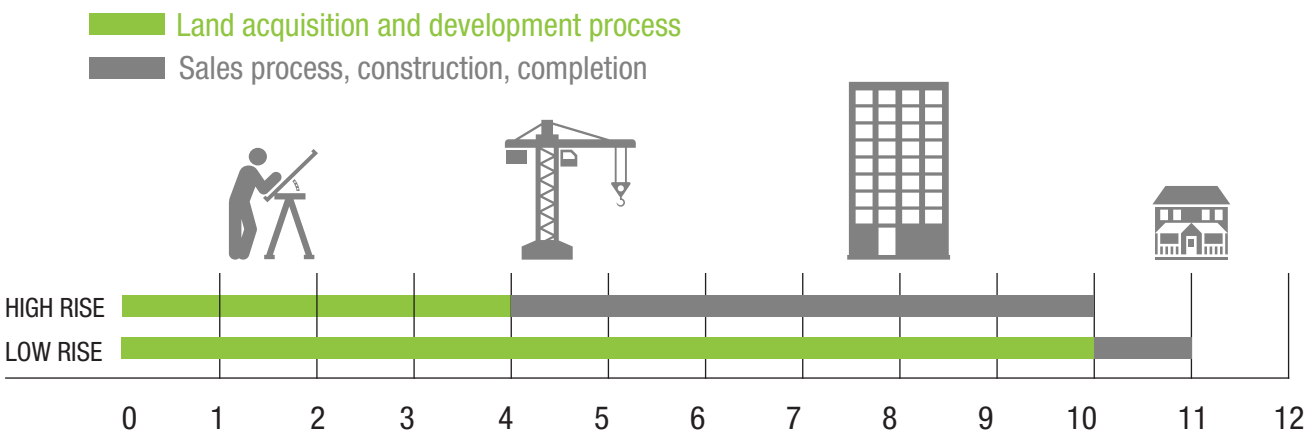

The Ontario Municipal Board is essential for the development approval process:

- ✓ An impartial, evidence-based, quasi-judicial administrative tribunal
- ✓ Removes local political sentiments from planning decisions
- ✓ Reviews development applications on planning merit, provincial and municipal policies, and makes decisions based on expert witness evidence
- ✓ Results in celebrated projects across the GTA

GETTING IT BUILT

It takes approximately 10 years to complete either a low-rise or high-rise development project in the GTA.

IMPACT OF PARKLAND FEE RATE ON PRICE OF A NEW HOME

Our industry is committed to providing parks and amenity space for new development. However, Ontario's parkland dedication provisions date back 40 years and were created with low-density development in mind.

Outdated policies don't align with the Province's intensification goals and policies.

BILD suggests municipalities cap parkland dedication fees at 5 to 10 per cent of the value of the development site or the site's land area as was done in the City of Toronto. This will benefit all types of housing.
