

RENOVATOR & CUSTOM BUILDER COUNCIL

How to use Prefabrication in Construction

The use of prefabrication in the construction industry has been on the rise in the last decade for larger buildings and components like washrooms; in the residential sector it has been used in new subdivisions as a new standard.

The next logical step for this process would allow for more customization in the prefabrication process which would open this approach to one-off projects and potentially be more cost-effective for the custom homes and renovation sectors.

Prefab Construction Topics:

- What are the changes to the schedule? Labour efficiency, bad weather, etc.
- How do the costs change?
- Is material management better?
- What are the restriction of the designs?
- How does the site location and logistics matter?
- Does quality get better?
- Do you retain your employees more?

Presenters:

Home Technology
Habitat for Humanity, Greater Toronto Area
Plus, more to come!

Session Details:

60-minutes of presentations by the panelists
20-minutes of panel discussion
20-minutes of questions & answers

Wednesday,
September 12, 2018

BILD
Awards Hall
20 Upjohn Road
Suite 100

3:00 - 5:00 p.m.

plus immediately following

**Building Science
Peer Exchange**

**Smart Home
Automation & Security**

BILD Boardroom
5:00 - 5:20 p.m.

RenoMark™
credit presentation
