

Residential Part 9 Air Barrier / Air Tightness

With Instructor **Andy Oding** of

Don't miss this fundamental workshop for high performance home builders

Date: Tuesday, May 28, 2019

Location: BILD Offices
20 Upjohn Rd, Toronto

Time: 8:30 AM-4:30 PM

\$259 + HST HBA member

\$309 + HST non-member

Group rates available.

Early bird pricing end May 15, 2019

Registration: www.enerquality.ca/training

Take an intensive one-day course covering key Residential Part 9 Air Barrier/Air Tightness, and learn how you can meet the current Ontario Building code for **less cost** (SB12) than prescriptive. Learn best practices, compile air barrier site-checklists, explore working details and more.

High performance air barriers and low infiltration rates are essential for ensuring healthy, comfortable, durable, efficient buildings and enclosure systems. Get ahead before air tightness testing becomes a common practice for building codes (as it already is for volunteer programs like Net Zero and ENERGY STAR®).

What you will learn:

- Air tightness / air barrier Ontario Building code requirements
- Future potential code and program air testing requirements
- Air testing / blower door operation and testing protocol
- Best practice air barrier details, scopes of work and contracts.

What you will leave with:

- Certificate of completion certifying trained status.
- Sample Site checklist for Air Barrier completion
- Sample Air Barrier details-best practice.

Participants say training

- "showed me how easy and affordable it is to build better"
- "taught me what mistakes not to make"
- "showed me how easy and affordable it is to build better"

Who should attend: Builders • Contractors • Site supervisors • Foremen • Site service • Architects and designers (BCIN designates) • Contracts/Purchasing • Building Officials • Drywall contractors and Air barrier trade contractors • All trade contractors who interact with the envelope of a home

This workshop satisfies OAA, PEO, AEE, OBOA and other Continuing Education Credits
