

Residential Construction Industry: Covid-19 Health and Safety Statement

The Residential Construction Industry across Ontario recognizes that we have an important role in curbing the spread of COVID-19.

During Ontario's State of Emergency it is important that we do our part to protect workers, contractors, suppliers, customers and their families from the spread of COVID-19 by adhering to Ontario Public Health and enhancing the health and safety conditions on our active jobsites.

Ontario workers continue to have the right to refuse unsafe worksites and should report these conditions to the appropriate authorities.

During Ontario's State of Emergency, we have thousands of homes and renovations to deliver to waiting families, whose future well-being is tied to the homes we are building. We need to continue to serve them in a safe and orderly way.

These are unprecedented times and the Residential Construction Industry is committed to doing our part to keep people safe during Ontario's COVID-19 State of Emergency.

We are all in this together. **#OntarioSpirit**
