

UPDATE: Construction deemed an ESSENTIAL Workplace

BILD members,

As a follow-up to the Premier's COVID-19 related announcement this afternoon ordering that at-risk work places be closed-down for an initial period of 14-days, please note that **construction has been classified as an essential workplace**.

BILD has been working diligently, and in conjunction with OHBA and RESCON on this matter, and we are pleased to note that under the "list of essential workplaces", industry activity is listed:

"28. Construction work and services, including demolition services, in the industrial, commercial, institutional and residential sectors;"

Please find the province's official news release [here](#) for additional information.
